

Friday, 15th May 2020

Dear Year 4,

We hope that you are all ok. Following the announcement on Sunday it will be a little while longer until we can see each other again. If we haven't heard from you for a while, please send us an email as we are missing you all. That was why it was so lovely to see so many of you in the film you made. We have to confess you managed to make us a little bit emotional!

We have now finished our Science and Explorers topic (however if you are in the middle of something please feel free to finish it. The padlets will still be available to you).

Please send us a photo of your finished Roman building by next Friday and we will put a slideshow on Facebook. The next topic it is an open topic called My Choice topic. The idea is that you choose a topic that you are interested in and find out about it. There is a new padlet to help you <https://padlet.com/year432/mychoiceproject>.

For maths we are now revising to get you ready for Year 5. There are videos on the school website in the maths section to help you with the methods

<https://www.newswanningtonprimary.org.uk/page/?title=Mathematics&pid=34>. This week we are concentrating on addition. There is work allocated to you on Mymaths. There are also some worksheets on the year 4 home learning page. You will need to add up the numbers in each box of then colour it the correct colour to make a mosaic just like the Romans! You could also use <https://www.topmarks.co.uk/maths-games/daily10> to give you some addition problems to try. Select level 4 addition and set the timer to manual to give yourself time to work them out.

On the subject of maths – we have a problem! We were speaking to Mrs Carr who said that her class have been playing on the education city play live snail game every week day at 11. She now thinks that year 3 are faster at their tables than year 4! If you can help us out, login to the play live game (it is in your times table folder on education city) at 11am and select the lower KS2 multiplication and division games. Mrs Carr thinks her year 3s can get the top 10 spaces on the leader board – let's show them what year 4s are made of!

This week the Webber-Jones family have been celebrating another birthday but this one was considerably bigger than 5! At least the cake supply is looking healthy!

The Mistry family have been busy decorating and making models.

2.

As always, let us know if you need any help with anything and keep sharing the fantastic work you have been doing.

Bye for now,

Mrs Webber-Jones and Mrs Mistry

Year4@new-swann.leics.sch.uk

Here is your quick glance overview of the work we have suggested this week. Remember, use it in the way that suits your family, using as much or as little as you want.

Maths	Addition - work on education city and mymaths. There are also some worksheets on the school website in the year 4 home learning folder.
Writing	https://www.pobble365.com/ gives you a new picture each day and some ideas for writing based on it.
My choice topic	Have a look at https://padlet.com/year432/mychoiceproject
Science	Keep an eye on the school facebook and youtube page for a video that will be posted early next week. It's all about a science game you can play and some investigations you could do based on it.
Reading	Rising stars reading comprehensions - https://my.risingstars-uk.com/ (use your mymaths login and the school ID 206071) And of course you can read your own reading book – If you have run out of books to read, you should have received an email this week giving you login details to access the oxford owl reading books. Let us know if you haven't received it.
Spelling	Resources on education city and activelearn.
Time tables	Resources on education city and ttrockstars. Remember, if you can, login to education city every week day at 11 to play the snail game.
Computing	use your code.org login to work through the modules.
