Crime Scene Report-Example

I was asked to investigate a disturbance which two citizens had reported taking place in the graveyard of Verona. Apparently they had seen two men fighting, but on arrival at the scene, there was no sign of anyone around. Investigating further, I noticed a light coming from one of the large family vaults. As I walked over, I saw that the grass had been trodden down and there were signs that a struggle may have taken place here. It was then that I noticed some objects scattered around the entrance of the tomb.
