

SQUARE

I have no vertices.
I have 1 side.
I have an infinite amount of lines of symmetry

CIRCLE

I have 4 vertices
2 of my sides are longer than the other 2.
I have 2 lines of symmetry.
I have 4 right angles.

EQUILATERAL TRIANGLE

I have 3 sides.
I have 3 vertices.
2 of my sides are the same length.
I have 1 line of symmetry.

RECTANGLE

I have 4 vertices
I have 4 sides.
I have 4 right angles.
I have 4 lines of symmetry.

IRREGULAR PENTAGON

I have 3 vertices.
I have 3 sides which are all the same length.
I have 3 lines of symmetry.

IRREGULAR
HEXAGON

I have 7 vertices.
I have 7 sides.
I have 7 lines of
symmetry.

REGULAR
OCTAGON

I have 3 sides.
I have 3 vertices.
I have 1 right angle.

ISOCELES
TRIANGLE

I have 5 vertices.
I have 5 sides.
I may not have any
lines of symmetry.

REGULAR
HEPTAGON

I have 6 vertices.
I have 6 sides.
I may not have any
lines of symmetry.

RIGHT ANGLED
TRIANGLE

I have 8 vertices.
I have 8 sides.
I have 8 lines of
symmetry.
